DETAILED ACTION

Allowable Subject Matter

Claims 1 – 11 are allowed.

The following is an examiner's statement of reasons for allowance:

Sakakura et al., Frank and Maekawa et al. show a balun with a common mode input/output and differential mode input/output but do not show the frequency characteristics as claimed in claim 1. Sakakura et al. shows composite frequency responses of the combined filter and balun (Figs. 8, 20) where Sakakura et al. does not teach or suggest any high-pass filter. Frank and Maekawa et al. shows only a balun comprising a common mode input/output and differential mode input/output where Frank shows only a BPF response and where Maekawa et al. does not illustrate and characteristic response, thus the prior art not teaching or suggesting the limitations of the claims, nor would it be obvious to combine the prior art to meet the limitations of the claims, thus the claims are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sakakura et al. – shows a laminated filter and balun.

Frank – shows an integrated balun.

Maekawa et al. – shows a laminated filter and balun.
